Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it is the same as US Patent 6,366,888. Please change to make relevant to the instant application. Correction is required. See MPEP § 608.01(b).

Claim Objections

2. Claims 18 and 45 are objected to because of the following informalities: PAC should be spelled out the first time it is used and not abbreviated. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 14,15-18, 41, and 43-45 are rejected under 35 U.S.C. 102(e) as being anticipated by Davidson et al. (6,246,345).

In regard to claims 14 and 41, Davidson et al. show an apparatus and method for providing at least first and second representations of a signal comprising: a first quantizer (claim 15) for quantizing the signal in accordance with a multidimensional lattice (col. 4, ln 40-45) and a second quantizer (claim 16) being complementary to each other (Fig. 2).

In regard to claims 16 and 43, Davidson et al. show that the signal includes a plurality of frequency components and the portion of the signal includes a subset of the plurality of frequency components (claim 15, frequency subbands).

In regard to claims 17,18,44, and 45, Davidson et al. show that the signal contains audio information and is encoded according to PAC (perceptual audio coding) techniques (col. 1, ln 14-25).

Allowable Subject Matter

5. Claims 15 and 42 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record, Davidson et al. (6,246,345) show a system and method for generating different representations of a signal. In regard to claims 15 and 42, they do not specifically show that at least one of the first and second multidimensional

lattices include a plurality of cells, at least two of the cells being different from each other.
